

**REMARKS**

The specification has been amended to correct clerical errors of the chemical names of structures 15 and 23 and of some NMR values of structures 4, 12, and 17 on Table 1 at page 24 and to correct the chemical name of structure No. 39 on Table 2 at page 34. These clerical errors have been inadvertently introduced with the Preliminary Amendment filed on March 18, 2008. No new matter has been added. Support for the amended specification can be found in the specification originally filed.

The Director is hereby authorized to charge all fees due, and credit any overpayments, to Deposit Account No. 50-0540.

Applicants believe that pending claims 1-45 are patentable and in condition for allowance.

Furthermore, Applicants are not aware of any prior art that has all of the elements of the claims or which in proper combination with other prior art would provide all of the elements of the claims. In view of the foregoing, Applicants respectfully submit that the claims are in condition for allowance and such action is earnestly solicited.

Respectfully submitted,

Date: April 14, 2008
